

Tiburon Lockers performs the way you wish your lockers could.

Your venue deserves the quality product and service that others promise. The difference is, we deliver.

Uniquely, Tiburon is the only company of its type to have engineered our product from the ground up. Support from the creators of the technology gives us the most reliable and flexible system, period. The fact that 94% of our partners elect to extend the relationship beyond the initial term says it all. We will happily refer you to those that have had our product in tests against competitors.

While other products detract from your overall image, Tiburon Lockers adds to it. Our state of the art lockers are contemporary looking and compliment each venue's style and ambiance. They accept cash, credit or debit, using our own proprietary technology. Our "Fair Share Software™" ensures that revenue received is accurate and up-to-date.

Features

- Back office administrative capabilities – Allows you to monitor revenue generation and use, as well as provide help to your customers in need.
- Remote support – The ability to access the system from any computer.
- Language choice – Variety of languages are available.
- Easy to use – Visual and audio instructions to guide your customers through the process.
- Multiple access options – Customers may bypass the kiosk and access their rental via keypad or barcode.
- In-House engineering – Allows us to integrate with your existing system and unlimited technology.
- Tiburon cloud interface – Allows you to access customer reports, activity or any information at your convenience.
- Floating – Innovation allows your guests to seamlessly transfer their rental to another locker location.

New Features

- Advanced Reservations - Convenient on-line advance locker reservations.
- Express Station - No queues, no more waiting!
- Mobile Rentals - Rent a locker from your smart phone or tablet.
- Mobile Access - Your patrons can open the locker from their mobile devices.
- Improved User Interface - All new intuitive touch screen interface.
- Text Alerts - Receive a text message when a locker is available.
- Multi Day Rentals - New options for multi day locker rentals.
- Admin & Management Functions - New and improved administration functions from smart phones and tablets.

Security

- Random locker assignment – Our proprietary technology prevents multiple rentals from being clustered.
- In the event of an emergency – Remote and on-site "Open All and/or Locker Down" feature, which is accessible from any computer. The lockers can also be opened in the event of a power failure.
- Secure access – Customer selected 4-digit PIN and alternate access options provide a level of security that other systems do not.
- Proprietary software – Our software tracks all the activity that occurs within the system.
